HISTORY

MISSION STATEMENT

MIP is a leading plastic packaging manufacturer in Lebanon, servicing a wide variety of industries operating in the Levant region and internationally.
We are dedicated to offering you the highest quality plastic products at competitive prices, along with quick and reliable delivery times.

YEARS OF EXPERIENCE

MIP's history dates back to 1953. At that time , plastic revolution was just beginning as plastics appeared to be a low-cost substitute for other materials. Foreseeing the growing needs and uses of plastic products, the Hayek family entered the plastic industry, producing consumer goods such as combs, cutlery and disposables. The company grew rapidly to become in 1975 the largest plastic manufacturing facility in the Middle East.

CUSTOM & STOCK PRODUCTION

In addition to our extensive range of stock containers that are available in a variety of shapes and sizes, we have the capacity to develop customized packaging that is tailored to unique product specifications.

We can handle all production stages, from conceptual design to manufacturing and decorating. wea can produce small and large quantities.
Excellent service, attention to details and competitive pricing assures our customers the very best in meeting their container requirements. We can produce small and large quantities of our standard liners or custom made products.

STATE OF THE ART FACILITIES

MIP's new facilities are located in a 15000 sqm land situated in Mazraat Yachouh in Beirut suburbs. The facility houses our design, manufacturing and warehousing operations. It is equipped with the latest technology and machinery to meet every new challenge. The plant operates to maximum efficiency.

WIDE VARIETY OF MANUFACTERING PROCESSES

MIP's business is split between four manufacturing processes, enabling clients to launch multiple products using a single supplier.

BLOW MOLDING

Is used to make thick items such as gallons, jars, bottles, etc.

THERMOFORMING

Is used to produce low cost thin or opaque transparent packages.

CO-EXTRUSION MULTILAYER BLOW MOLDING

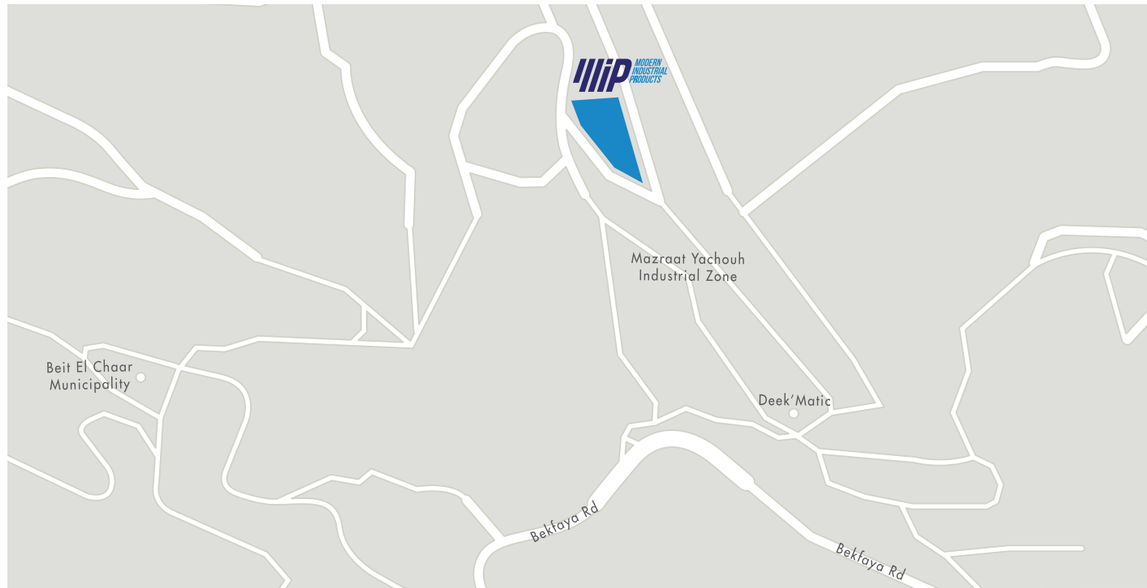
Is used to package products such as kechup, mayo and milk. This technique improves products shelf-life drastically.

PET

Is used to produce low cost thin or opaque transparent packages.

INJECTION MOLDING

Is used to obtain high quality and strong products including food & beverage packaging and cutlery.



TECHNOLOGY

VARIOUS MATERIALS

POLYPROPYLENE

Used for microwaveable and/or translucent items. Excellent for hot filling.

POLYSTYRENE

Used for crystal - like transparency.
Non resistant to shocks.

EVOH

100% oxygen barrier used in conjunction with polyethylene and polypropylene.

PET

Used to produce crystal clear transparency.
Shock-resistant items.

DIFFERENT DECORATING TECHNIQUES

No matter how complex your finishing needs, MIP offers the technical expertise and machinery necessary to produce the finest quality plastic containers decorated with consumer appeal. We use different printing methods:

OFFSET PRINTING

High speed and high accuracy. Printing up to 6 colors.

SLEEVING

Entire coverage of a bottle with a printed plastic sleeve.

SILK SCREENING

Universal printing for small productions.
Maximum of 4 colors.

GOLD LEAFING

LABELING

Inlaying paper labels on bottles and gallons.
